

Cijferend Vermenigvuldigen

start

The image displays a grid of 18 multiplication problems, arranged in 6 rows and 3 columns. Each problem is presented on a 4x10 grid. A horizontal line is drawn across the second row of each grid. The first problem in the top-left corner has a blue arrow pointing to the digit '2' in the number '12', with a cloud-shaped callout containing the word 'start'. The second problem in the top row has a yellow box around the '2' and an 'X' to its right. The remaining 16 problems in the grid also have a yellow box around the '2' and an 'X' to its right, but they do not have the 'start' callout.
